

Problem

Build an app which can be used by users to search GIFs by keywords.

Tasks –

1. Allow users to search for GIFs via keywords.
2. Show matching GIFs in a space optimized grid.
3. Play and pause GIFs.
4. Should be responsive.
5. Write reusable code.
6. Code should be in working state.

Good to have –

1. Infinite scroll
2. A progressive web app
3. Unit tests. You can use any library like Mocha, Jest etc.

Choice of libraries and language

1. Should be written in javascript (ES6 preferably)
2. Libraries - You can use React.js or Vue.js or You can write this in pure Vanilla js.

How to fetch GIFs ?

1. Visit <https://developers.giphy.com>
2. Signup and create a new app to get a beta API Key
3. Read the docs <https://developers.giphy.com/docs/>

Post completion-

Create github repo and push code there and share the repo details with us or zip the project and send it to Sandeep.rao@viacom18.com
